WebDT SimulCAST System

Instant Message Broadcasting Anytime Anywhere

Emergencies and urgent situations don't work on a 9 to 5 schedule. The need for high-priority communication channels on campus and in corporate offices has never been clearer than it is today. The WebDT SimulCAST System offers solutions to:

- Enhance corporate/ school security

- Support Urgent Cast messages to students/ employees

- Centralized control for security

- Web-based & mobile phone administration of urgent messages

- Instant download of messages to PC client software

WebDT SimulCAST is part of the WebDT Content Manager software suite, a key component of the comprehensive WebDT Digital Signage System. With the WebDT SimulCAST System, school/ corporate departments can broadcast "Emergency" messages instantly and simultaneously. Control the messages centrally and distribute them via the web-based management interface, publishing to every digital signage display and to every computer within the network. Distribute messages by county, by building, or by department.
